

SCOPE OF WORK & QUOTATION

E-Commerce Website & Admin Panel for Watches, Jewellery & Chains

Date: 17 July 2026

1. Project Overview

This document outlines the scope of work, deliverables, timeline and cost estimate for the design and development of a custom e-commerce website and admin panel for a business dealing in watches, jewellery and chains. The platform will allow customers to browse and purchase products online with secure card payments via Razorpay, apply coupon/discount codes, view prices in their local currency and submit product reviews, while the admin panel will give the business control over products, categories, orders, coupons and content.

Key points for this engagement:

- **Payment:** Only card payment will be enabled on the storefront (via Razorpay).
- **Inventory:** The platform will not maintain or track product inventory/stock levels; product availability is managed manually by the admin (e.g., show/hide a product).
- **Product Reviews:** Reviews are not editable by the admin. Customers can submit new reviews; admin can only view (and remove, if required) submitted reviews.
- **Coupons:** Customers can apply a coupon/discount code at checkout; codes are created and managed by the admin.
- **Currency Display:** Prices will auto-display in the visitor's local currency based on location for reference; the actual transaction will still be processed in INR via Razorpay.

2. Scope of Work

2.1 Customer-Facing Website

- **Home Page** – banners, featured collections and brand storytelling sections.
- **Products Page** – category-wise listing with filters (price, category, metal/stone type) and sorting.
- **Product Detail Page** – image gallery, description, pricing and variant display (size, color).
- **Cart Side Panel** – slide-out cart showing items, quantity, price and running total.
- **Checkout Page** – shipping address, order summary, coupon code application and card payment via Razorpay, in a single guided flow.
- **Coupon / Discount Code** – customers can apply an admin-issued coupon code at checkout to avail a discount.
- **Auto Currency Detection & Multi-Currency Display** – visitor's location is detected and product prices are displayed in the corresponding local currency (display only; payment is processed in INR).
- **Terms & Conditions / Privacy Policy Pages** – CMS-editable static pages.
- **Product Reviews** – customers can view and submit a rating/review on the product page (not editable once submitted).
- **Fully responsive design** across mobile, tablet and desktop.

2.2 Admin Panel

- **Dashboard** – snapshot of orders and revenue (no inventory/stock tracking).
- **Products CRUD** – add/edit/delete products with images, sizes, colors, description and pricing.
- **Category Management** – name, image and slug (URL) for each category.

- Order Management – view orders with product/variant, amount, quantity and order status updates (e.g., Placed, Confirmed, Shipped, Delivered, Cancelled).
- Coupon Management – create, edit, activate/deactivate discount codes (e.g., flat/percentage off, validity period).
- Contact Us – view and manage customer enquiries submitted from the website.
- Content Management – CMS-editable Terms & Conditions and Privacy Policy content.
- Product Reviews – view submitted reviews; remove/hide if required (content is not editable by admin).

2.3 Future Scope (Not Included in Current Budget – Available as a Later Phase)

The following are kept out of the current scope to stay within budget and the timeline. They can be scoped and quoted separately once the base platform is live:

- Inventory / stock management.
- Additional payment options – UPI, net banking, wallets.
- Admin reply/moderation workflow on reviews (approve/reject/reply).
- Advanced analytics & reporting dashboard.
- Mobile app (iOS/Android).
- Business/domain expansion – additional product categories, multi-store or B2B storefront.

3. Technology Stack

- Frontend: React / Next.js
- Backend: Next API / Node.js
- Database: Supabase / MongoDB
- Payments: Razorpay Payment Gateway (card payments only)
- Hosting: Vercel / Dedicated Server

4. Hosting Capacity & Traffic Scope

This section sets expectations on how much traffic the initial setup can comfortably handle, and what it costs to scale beyond that.

Initial setup (included in this quotation)

Launching on Vercel's free/entry tier and Supabase's free tier is sufficient for a new store's launch phase — to stay on the safer side, we are scoping this for up to about 10,000 monthly active users, with bandwidth and database usage comfortably within the free-tier limits. This comfortably covers early traffic and order volumes for a newly launched store.

Note: Vercel's free tier is positioned for personal/non-commercial projects. For a live commercial store, we recommend budgeting for Vercel's paid plan from launch (estimate included in Section 6) to stay within its commercial-use terms and get production-grade reliability.

Upgrade path (as traffic grows)

When traffic or data volume goes beyond the above limits (higher bandwidth, larger database, more concurrent users), upgrading Vercel and Supabase to their next paid tier costs approximately ₹3,800–₹4,000/month combined, and scales further on a pay-as-you-go basis as traffic increases. This upgrade is a hosting cost only — no additional development charges apply unless new features are required.

5. Project Timeline

The estimated timeline from project kick-off (post advance payment and receipt of content/assets) to go-live is 5 weeks (~35 days), inclusive of a contingency buffer, broken down as follows:

#	Phase	Duration
1	UI/UX Mockup Design & Client Approval	5 days
2	Website Front-End Development (incl. coupons & currency display)	9 days
3	Admin Panel Development (incl. coupon management)	8 days
4	Razorpay (Card) Payment Integration & Internal Testing	3 days
5	QA, Testing & Bug Fixing	5 days
6	Buffer / Contingency	3 days
7	Deployment & Go-Live	2 days

Total Estimated Duration: ~35 days (5 weeks, including buffer)

6. Cost Quotation

All amounts are in Indian Rupees (INR). Figures below are development charges only — exclusive of GST (applicable extra, as per actuals) and exclusive of domain, hosting/server and email service costs, which are estimated separately below.

A. Customer-Facing Website

#	Website Module	Amount (INR)
1	Home Page (banners, featured collections, brand story)	8,000
2	Products Listing & Detail Page (filters, sort, variants)	12,000
3	Cart Side Panel	4,000
4	Checkout Page (Razorpay – card payment)	8,000
5	Coupon / Discount Code Application	8,000
6	Auto Currency Detection & Multi-Currency Display	6,000
7	Terms & Conditions / Privacy Policy Pages (CMS-editable)	4,000
8	Product Reviews (customer submission & display)	4,000
9	Responsive UI/UX Design (mobile, tablet, desktop)	6,000
	Sub-total – Website	60,000

B. Admin Panel

#	Admin Panel Module	Amount (INR)
1	Admin Dashboard (orders & revenue overview)	8,000
2	Product Management (CRUD, images, sizes, colors, pricing)	15,000

#	Admin Panel Module	Amount (INR)
3	Category Management (name, image, slug)	5,000
4	Order Management (status workflow)	10,000
5	Coupon Management (create/edit/manage discount codes)	6,000
6	Contact Us – Enquiry Management	4,000
7	Content Management (T&C / Privacy Policy)	3,000
8	Product Reviews (view / remove)	5,000
	Sub-total – Admin Panel	56,000

C. Project Setup, Testing & Deployment

#	Item	Amount (INR)
1	Project Setup & Deployment (Vercel)	3,000
2	QA & Cross-browser / Cross-device Testing	3,000
	Sub-total – Setup & Deployment	6,000

Total Development Cost: ₹1,22,000 (excl. GST, domain, server/hosting upgrades and email service – see below)

D. Third-Party / Recurring Cost Estimate (Not part of the ₹1,22,000 above)

These are approximate, provider-billed costs — payable directly by the client (or reimbursed at actuals) — and are not part of the development fee. Actual figures depend on the plans chosen and provider pricing at the time of setup.

#	Item	Estimated Cost
1	Domain Registration (.com, per year, based on domain availability)	₹1,000 – ₹2,000 / year
2	Hosting – Vercel (recommended Pro plan for commercial use)	~₹1,700 / month
3	Database – Supabase (Pro plan, recommended for production)	~₹2,100 / month
4	Email Service (transactional emails – order confirmations etc.)	₹0 – ₹1,500 / month
	Estimated Recurring Cost	~₹3,800–₹5,300 / month

7. Payment Terms

- 30% on finalization and approval of the UI/UX mockup design.
- 40% when product development reaches approximately 70–80% completion.
- 30% after the website goes live.
- Payments to be made via bank transfer / UPI / the mode agreed.
- Advance/milestone payments are non-refundable once the corresponding work has commenced.
- Work will be paused if any milestone payment is delayed beyond 7 days from the invoice date.

8. Revisions & Change Policy

Up to 3 rounds of changes are included per module (as listed in Section 2). Any change requested beyond the 3 included rounds for a module will be treated as additional scope and quoted/charged separately before being taken up.

9. Important Note – Requirements Clarity

Before development begins on each module, the client is requested to finalize and share clear requirements for the exact details and data to be displayed (e.g., which product fields, images, pricing rules, category structure, and page content). Requirement changes introduced after development has started on a module will count towards the 3 included change rounds in Section 8, and may affect the 5-week timeline.

10. Terms & Conditions

- **Validity:** This quotation is valid for 30 days from the date of issue.
- **Scope changes:** Any feature, page or module not listed in Section 2 is considered out of scope (see Section 2.3 – Future Scope) and will be quoted separately.
- **Content & assets:** Product images, descriptions, logo, brand guidelines and legal content (Terms & Conditions, Privacy Policy text) are to be provided by the client. Delays in providing content may extend the delivery timeline.
- **Third-party services:** Costs, approvals and account setup for Razorpay, hosting, domain, SSL certificate and email services are the client's responsibility unless otherwise agreed (see Section 6D for estimates).
- **Warranty support:** 15 days of free bug-fixing support (for issues in delivered scope only) is included post go-live.
- **Maintenance:** Ongoing maintenance, feature additions or support beyond the warranty period will be covered under a separate Annual Maintenance Contract (AMC), quoted on request.
- **Source code & ownership:** Full source code and design ownership will be transferred to the client only upon receipt of 100% payment.
- **Confidentiality:** Both parties agree to keep all business, financial and technical information shared during the project confidential.
- **Intellectual property:** [Your Company Name] retains the right to showcase the completed project in its portfolio, unless the client requests otherwise in writing.
- **Force majeure:** Neither party will be held liable for delays caused by circumstances beyond reasonable control (e.g., natural disasters, third-party service outages).
- **Cancellation:** In case of project cancellation by the client, payment will be due for all work completed till the date of cancellation; milestone payments already made are non-refundable.
- **Governing law:** This agreement is governed by the laws of India, with jurisdiction at [City], for any disputes.

11. Acceptance

By signing below, both parties agree to the scope of work, cost and terms mentioned in this document.
